Dr Mo El-Haj - PhD, FHEA, MBCS

Associate Professor and Director of NLP@VinUni
Honorary Researcher, Lancaster University, United Kingdom
Nationality: British – United Kingdom
Publication and citation record: Google Scholar | Publications page | Personal Page

Research profile

Associate Professor in Computer Science and Natural Language Processing (NLP), with over 15 years of experience in research, teaching and academic leadership. Author of more than 100 peer-reviewed publications, with over 3,000 citations, an h-index of 31 and an i10-index of 62 (Google Scholar, October 2026). My research focuses on multilingual NLP, large language models (LLMs), generative AI, trustworthy AI and low-resource language technologies. I lead international research projects developing language resources, computational models and evaluation frameworks, with applications in finance, healthcare, public policy and education. My work combines fundamental NLP research with applied AI, including cross-lingual learning, language model evaluation, information extraction and domain-specific language technologies. I have extensive experience in academic leadership, securing research funding, supervising researchers and establishing international collaborations.

Academic appointments and leadership

2025-present **Associate Professor and Founder and Director of NLP@VinUni Research Group**, VinUniversity, Hanoi, Vietnam

- Founded and lead NLP@VinUni, a multidisciplinary research group of over 30 members, setting its research strategy, developing funded programmes and establishing international academic partnerships.
- Lead research in generative and trustworthy AI, multilingual NLP, large language models and agentic systems, with interdisciplinary applications in healthcare, finance, education, public policy and cultural heritage.
- Supervise doctoral students, four researchers and a team of teaching assistants, while contributing to university research strategy, governance and ethical oversight through membership of the University Research Committee and University Ethics Committee.

2025-present **Visiting Researcher**, Lancaster University, United Kingdom

- Maintain active research collaborations in multilingual and generative AI, trustworthy AI, language technologies and interdisciplinary research.
- Continue supervising doctoral researchers and developing joint research projects, publications and international partnerships with Lancaster colleagues.

2023-2025 **Director of Admissions**, School of Computing and Communications, Lancaster University, United Kingdom

- Held strategic and operational responsibility for admissions and recruitment across four undergraduate degree programmes, including applicant engagement, admissions decisions, quality assurance and compliance.
- Managed more than 35 Student Ambassadors and five professional services staff, overseeing recruitment activities, training, workload planning and performance.
- Led and coordinated recruitment events, outreach and international engagement, working with academic departments and university professional services to support recruitment strategy and student conversion.

2023–2025 Senior Lecturer in Natural Language Processing, Lancaster University, United Kingdom

- Led independent and collaborative research programmes in multilingual NLP, generative AI and language technologies, securing research funding and developing partnerships with academic, government and industry organisations.
- Served as Co-Director of the UCREL NLP Research Group, contributing to research strategy, international collaboration, funding development and the supervision of researchers and doctoral students.
- Contributed to undergraduate and postgraduate teaching, curriculum development, doctoral supervision, academic administration and international research community leadership.

2019–2023 Lecturer in Natural Language Processing, Lancaster University, United Kingdom

- Developed an independent research portfolio in multilingual NLP, summarisation, information extraction, semantic analysis and language technologies for under-resourced languages.
- Led and contributed to funded research projects, developing multilingual corpora, computational methods, software tools and evaluation resources with international collaborators.

- Delivered undergraduate and postgraduate teaching, developed teaching materials and assessments, and supervised undergraduate, Master's and doctoral research projects.

2012-2019 **Senior Research Associate**, Lancaster University, United Kingdom

- Conducted research on multilingual NLP, automatic summarisation, information extraction, readability and semantic analysis within externally funded interdisciplinary programmes.
- Developed multilingual corpora, language processing tools and computational methods for analysing large-scale textual data, contributing to research publications and reusable resources.

2011-2011 **NLP Researcher**, National Institute of Informatics, Tokyo, Japan

- Conducted research in multilingual NLP, automatic summarisation and cross-language information retrieval, contributing to international evaluation and benchmarking activities.

2010-2012 **Data Migration and Systems Developer**, UK Data Archive, University of Essex, United Kingdom

- Developed large-scale data processing, migration and retrieval systems, supporting reliable management and preservation of research data.

Education and professional recognition

Academic qualifications

2012 **PhD in Computer Science**, University of Essex, United Kingdom

2021 **Fellow of the Higher Education Academy (FHEA),** Advance HE, United Kingdom

2008 **MSc in Information Systems**, University of Jordan

2005 **BSc in Computer Information Systems**, University of Jordan

Fellowships and professional memberships

2026 Professional Member, British Computer Society (MBCS)

2026 Professional Member, Association for Computing Machinery (ACM)

Awards

- 2026: Best Resource Paper Award, ArabicNLP 2026 (EMNLP 2026), Budapest, Hungary, for AraDetox: A Multi-Dialect Arabic Detoxification Dataset.
- 2025: Research Contribution Award, VinUniversity, Vietnam.
- 2025: Recognition Award for participation in the inauguration of the Doha Historical Dictionary of the Arabic Language and presentation of the ArabJobs dataset, Doha, Qatar.
- 2022: Best Presentation Award, LITHME Summer School, Pristina, Kosovo.
- 2016: Best Audience-Facing Tool, winning team, BBC NewsHack, London, UK.
- 2011: Fully Funded Research Internship, National Institute of Informatics, Tokyo, Japan.
- 2009: Best Paper Award, 4th Language and Technology Conference, Poznań, Poland.

Languages

Spoken languages: Arabic and English, fluent at native level.

NLP and corpus processing experience: advanced in English, Arabic, Arabic dialects and Welsh; substantial in Vietnamese and French; intermediate in Greek and Spanish; additional project exposure in Portuguese, Chinese, Urdu and Hindi.

Research Leadership and Academic Impact

- **Founder and Director, NLP@VinUni Research Group (2025–present):** Established and currently lead a multidisciplinary research group of over 30 members at VinUniversity, setting its research strategy, leading funded projects, supervising researchers and postgraduate students, and developing international research partnerships in multilingual and trustworthy AI.

- **Co-Director, UCREL NLP Research Group, Lancaster University:** Contributed to the strategic leadership of an internationally established research group, including research development, externally funded projects, international collaborations and the supervision and mentoring of researchers in computational linguistics and language technologies.
- **Research Funding:** Led or contributed to 22 funded research projects with a combined value exceeding US$2.25 million, supported by national and international research councils, government organisations, universities and industry partners. Projects span multilingual AI, language technologies, public policy, healthcare, finance and education.
- **International Research Collaboration:** Established and maintained partnerships with universities, research institutes and industry organisations across Europe, Asia and North America, leading interdisciplinary collaborations involving computer science, linguistics, humanities and social sciences.
- **Research Impact:** Published over 100 peer-reviewed research outputs, attracting 2,950 citations, with an h-index of 31 and an i10-index of 59 (Google Scholar, October 2026). Developed or contributed to more than 50 multilingual datasets, corpora, benchmarks and language resources supporting research on under-represented languages and improving access to language technologies.
- **International Academic Leadership and Service:** Founded and chaired international research workshops and initiatives, including AbjadNLP and the Financial Narrative Processing Workshop series. Served as Workshop Chair for COLING 2025, Area Chair and Programme Chair for major NLP conferences, and member of editorial and advisory boards, contributing to international research collaboration and community development.

Research Expertise and Outputs

- **Generative, Multimodal and Agentic AI:** Large language models, multi-agent systems, reasoning, retrieval-augmented generation, question answering, document understanding and multimodal processing of text, images and structured data.
- **Trustworthy and Responsible AI:** Model reliability, uncertainty-aware evaluation, capability drift, catastrophic forgetting, evidence grounding and the responsible deployment of AI in healthcare, finance, government and other high-stakes environments.
- **Multilingual and Low-Resource AI:** Multilingual language modelling, instruction tuning, cross-lingual transfer, corpus development and evaluation across more than 20 languages, with particular emphasis on linguistic diversity and under-represented languages.
- **AI Evaluation and Data:** Development of evaluation frameworks, benchmarks and annotation studies, including expert and crowdsourced annotation, quality assurance, inter-annotator agreement and systematic analysis of model performance.
- **Research Engineering:** Development of scalable Python pipelines for data processing, model training and adaptation, experimentation, benchmarking and reproducible evaluation of AI systems.
- **Open Research Resources and Infrastructure:** Development and public release of multilingual datasets, corpora, benchmarks, lexical resources, ontologies, models and research software through GitHub, Hugging Face and institutional repositories.

Multilingual NLP and Low-Resource Language Technologies

- My research focuses on developing NLP methods, language models and computational resources for multilingual and under-resourced languages. In Wales, I have led and contributed to projects supporting the Welsh Government's Cymraeg 2050 strategy, developing automatic summarisation systems, lexical resources and language technologies to improve access to Welsh-language information and digital services.
- I collaborate with academic, public-sector and community organisations to develop and evaluate language technologies for real-world applications. My collaborations include schools, museums, the National Trust, the National Library of Wales and other institutions, with a focus on building practical NLP tools, improving language accessibility and supporting the adoption of AI technologies.
- My research covers Welsh, Vietnamese, Igbo, Arabic dialects and languages written in Arabic-based scripts, including Ajami traditions. I develop multilingual corpora, annotated datasets, language models and evaluation benchmarks to address challenges in low-resource NLP, cross-lingual transfer and language representation. I also lead initiatives such as AbjadNLP to support research collaboration, resource development and evaluation across under-represented languages.
- I apply NLP, machine learning and large language models to a range of textual domains, including financial documents, legal texts, literature, historical archives, Arabic poetry and social media. My research addresses information extraction, text classification, summarisation, semantic analysis and language model evaluation, with particular emphasis on multilingual robustness, reliability, fairness and the development of trustworthy AI systems.

Funded research and projects

Led or contributed to funded research projects with a combined value exceeding US$2.25 million, supported by UK and international research councils, government organisations, universities and industry partners.

Current and recent projects

2026 **PolicyVerse: Multilingual Multi-Agent LLMs for Policy Reasoning**
Principal Investigator | Accelerating Research Excellence Program | US$100,000. Develops a multi-agent LLM framework that detects overlaps and potential inconsistencies and maps dependencies across policy documents.

2026 **PolyDrift: Instruction-Language Drift in Adapted Multilingual Instruction-Tuned LLMs**
Principal Investigator | CECS Seed Funds | US$20,000. Investigates instruction-language drift in multilingual instruction-tuned models after post-adaptation.

2026 **Dynamic Models for Real-Time Autonomous Decision Making in the Real World**
Co-Investigator | Accelerating Research Excellence Program | US$100,000. Develops approaches for decision-making under epistemic uncertainty and environmental stochasticity.

2025 **Detecting Greenwashing and Greenhushing Risks with Advanced NLP**
Co-Investigator | CBM Seed Funds, VinUniversity | US$18,000. Develops a data-driven framework for firm-level assessment of greenwashing and greenhushing risks.

2025 **FreeTxt-Vi Vietnamese-English Free-Text Survey Analysis**
Principal Investigator | VinUniversity Cross College Funds | US$7,200. Builds a bilingual platform for analysing open-ended survey responses.

2025 **Monitoring Water Pipe Bursts with NLP**
Consultant | South West Water, United Kingdom | US$13,400. Uses natural-language reports to predict and monitor water infrastructure failure.

2025 **A Small Welsh Language Model Pilot for Sentiment Analysis Testing**
Principal Investigator at Lancaster University | Welsh Government | US$13,400. Tests a transformer-based language model for Welsh sentiment analysis. The project was led by Cardiff University – Prof. Dawn Knight.

2024 **DigiGrid Welsh Language Resource Hub**
Principal Investigator at Lancaster University | Welsh Government | US$6,700. Develops infrastructure for collecting and managing Welsh-language resources. The project was led by Cardiff University – Prof. Dawn Knight.

2024 **FreeTxt: supporting bilingual free-text survey and questionnaire data analysis**
Co-investigator | AHRC UKRI | US$107,000 | Builds a bilingual platform for analysing open-ended survey responses. | The project was led by Cardiff University – Prof. Dawn Knight.

2024 **Catalyst for Celtic Languages NLP Research**
Principal Investigator | Lancaster University | US$13,300. Supports the development of datasets and tools for low-resource Celtic languages.

Earlier projects

2023 **CARE Canadian Annual Reports Extractor**
Principal Investigator | Mitacs, HEC Montréal and CPA Canada | US$38,100. Developed a corpus and processing pipeline for financial NLP in Canadian corporate disclosures.

2023 **Beyond the Paycheck**
External Collaborator | Carlsberg Foundation, grant CF23-0987 | US$700,000. Research collaboration with Dr Seetha Menon at the University of Southern Denmark.

2022 **Thesaurus of Contemporary Welsh**
Principal Investigator | Welsh Government | US$134,000. Constructed a modern Welsh thesaurus using distributional embeddings.

2022 **Welsh Summary Creator**
Principal Investigator | Welsh Government | US$134,000. Developed an automatic summarisation system for Welsh texts.

2021 **CLARA-Fin Financial Readability**
External Collaborator | Spanish Agency for Research | US$46,990. Developed readability metrics for financial disclosures in English and Spanish.

2021 **Corporate Disclosure Assessment AS15**
Principal Investigator | IAAER and KPMG | US$27,940. Evaluated corporate narrative disclosures.

2021 **AraSAS Arabic USAS Tagger**

Principal Investigator | Zayed University, United Arab Emirates | US$7,620. Developed an Arabic semantic tagger aligned with the USAS framework.

2018 **FinT-ESP Spanish Financial Texts**
External Collaborator | Spanish Agency for Research | US$44,450. Built and analysed Spanish financial corpora.

2018 **Bio Text Mining BioTM**
Senior Researcher | Wellcome Trust, United Kingdom | US$120,000. Applied biomedical text mining to mental-health and biomedical literature.

2014 **Understanding Corporate Communication**
Senior Researcher | UKRI | US$100,000. Analysed narrative strategies in corporate communication.

2012 **Influences on the Corporate Financial Information Environment**
Senior Researcher | UKRI | US$380,000. Investigated relationships among media coverage, corporate reporting and investor response.

2012 **SKOS-HASSET English Social Science Thesaurus**
Researcher | Jisc | US$120,000. Developed a SKOS-based thesaurus for social-science terminology.

Teaching

Over 15 years of undergraduate and postgraduate teaching experience across Computer Science, Artificial Intelligence, Natural Language Processing, Machine Learning and Data Science, including AI ethics and responsible AI. Extensive experience in module leadership, curriculum development, assessment design, research-led teaching and supervision of undergraduate and postgraduate research projects. Experienced in teaching culturally diverse cohorts of over 400 students, integrating theoretical foundations with practical applications and current research in AI and NLP.

- Artificial Intelligence, including AI Ethics and Responsible AI: PG and UG
- Natural Language Processing and Language Technologies: PG and UG
- Data Science Programming: PG and UG
- Databases: PG and UG
- Data Visualisation: PG and UG
- Data Mining: PG and UG
- Computer Science Seminars: UG
- Languages and Compilers: UG

Doctoral Supervision and Examination

- **Doctoral supervision:** Four PhD students successfully completed under my supervision, with 5 doctoral researchers currently under supervision across Lancaster University (two), VinUniversity (two) and Autonomous University of Madrid (one). I also supervise Master's research projects, research assistants and early-career researchers.
- **Doctoral examination:** Served as an external PhD viva examiner for more than 15 doctoral candidates at UK and international universities.
- **External examining:** Experience as an external examiner for universities including the University of Portsmouth, British University in Dubai, Lancaster University programmes in Leipzig and Ghana, Beijing Jiaotong University (BJTU) and Sunway University.
- **Project and experiential learning:** Supervision of Masters and undergraduate research opportunities, undergraduate and postgraduate capstone projects, and student internship programmes.

Academic and professional service

- **General Chair:** Financial Narrative Processing Workshop Series; NLP for Languages Using Arabic Script AbjadNLP; Workshop on Arabic Corpus Linguistics; Celtic Languages in the Digital Age; NLP Bridges; LLMs Big Data and Multilinguality for All; Readability for Low Resourced Languages.
- **Workshop Chair:** International Conference on Computational Linguistics (COLING 2025)
- **Programme Chair:** International Conference on NLP and AI for Cyber Security 2024; Healthcare Text Analytics Conference 2024; IndoNLP Workshop; Nakba-NLP Workshop Series; Open-Source Arabic Corpora and Processing Tools OSACT7.
- **Publication Chair:** Workshop on Arabic NLP (WANLP)

- **Ethics Chair:** ArabicNLP Conference 2027
- **Area Chair:** Information Extraction and Low Resource and Endangered Languages for ACL, LREC, COLING, EMNLP and ArabicNLP.
- **Boards:** Advisory Board, SIGARAB; Editorial Board, Natural Language Processing; Advisory Board, John Benjamins Natural Language Processing book series.
- **Programme committees:** Regular service for leading NLP and AI conferences and workshops.
- **Shared tasks and community initiatives:** Leadership of international activities in financial NLP, Arabic NLP, multilingual NLP and generative AI.
