 Lancaster, United Kingdom and Hanoi, Vietnam
 British Citizen | English speaker

With over 15 years of experience in Artificial Intelligence and Natural Language Processing, I have built and led internationally recognised AI and NLP research programmes spanning academia, industry, and the public sector. I currently serve as Director of NLP @ VinUniversity and Co-Director of the UCREL NLP Research Group, and have previously held institutional leadership roles including Director of Admissions at Lancaster University. My work focuses on multilingual large language models, agentic AI, trustworthy Financial AI, and the development of reliable and deployable AI systems for regulated and high-stakes environments. My research spans multilingual modelling, low-resource languages, scalable NLP infrastructures, and uncertainty-aware AI systems, alongside the creation of language resources such as corpora, benchmarks, thesauri, and ontologies that support robust modelling and evaluation. I have led multidisciplinary teams of researchers, engineers, and staff, and have served as Principal Investigator on externally funded research projects, delivering strategic AI initiatives from conception to deployment. I work extensively on large language models, agentic workflows, and AI across domains including finance, healthcare, governance, and education, combining methodological innovation with clear pathways to societal and industrial impact. I am a Fellow of the Higher Education Academy (FHEA) and a member of IEEE, ACL, ELRA, ACM, and the British Computer Society (MBCS).

PROFESSIONAL EXPERIENCE

2025 Present	Associate Professor (Reader) & Founder, NLP @ VinUni Research Group, VINUNIVERSITY, Hanoi, Vietnam ➤ Founded <i>NLP @ VinUni</i>, leading research in Generative AI, multilingual NLP, multimodal large language models, and agentic AI across domains including healthcare, finance, education, policy, and public-sector applications. ➤ Lead research on large language models and multimodal AI, integrating text, images, and structured data for tasks including summarisation, information extraction, question answering, reasoning, and decision support. ➤ Design and develop multilingual LLMs, retrieval-augmented generation (RAG), and agent-based AI systems for real-world deployment in regulated and high-impact environments. ➤ Secure and lead externally funded AI research projects, supervising multidisciplinary research teams and collaborating with international academic and industry partners. ➤ Build scalable AI infrastructures, evaluation benchmarks, and multilingual resources supporting trustworthy and deployable Generative AI systems.
2025 Present	Visiting Researcher, LANCASTER UNIVERSITY, United Kingdom ➤ Conduct research on multilingual Generative AI, large language models, and multimodal NLP in collaboration with international research groups. ➤ Develop novel AI methodologies spanning multilingual reasoning, LLM evaluation, multimodal learning, and trustworthy AI.

2023 2025	Director of Admissions, LANCASTER UNIVERSITY, United Kingdom ➤ Provided strategic leadership for undergraduate and postgraduate admissions across the School, overseeing recruitment activities, admissions operations, and applicant engagement. ➤ Managed a team of more than 35 Student Ambassadors and 5 professional services staff, providing leadership, training, workload planning, and performance oversight. ➤ Worked closely with the Marketing Team, External Engagement Team, Dean's Offices, International Office, Careers Service, and academic departments to develop and deliver recruitment strategies and applicant conversion initiatives. ➤ Planned, coordinated, and led Open Days, Applicant Visit Days, Offer Holder events, school outreach activities, and international recruitment events, representing the School to prospective students, parents, and external stakeholders. ➤ Oversaw admissions decision-making processes, ensuring fairness, consistency, quality assurance, and compliance with University policies and sector regulations. ➤ Developed data-informed recruitment strategies by analysing admissions trends, applicant data, and conversion metrics to support institutional planning and continuous improvement. ➤ Led operational planning across admissions cycles, coordinating academic and professional services teams to ensure the timely delivery of recruitment objectives.
2019 2025	Lecturer / Senior Lecturer, Co-Director of UCREL, Director of Admissions, LANCASTER UNIVERSITY, United Kingdom ➤ Led research in multilingual NLP, Generative AI, and large language models, delivering novel methods for text generation, information extraction, summarisation, semantic analysis, and trustworthy AI. ➤ Established international research collaborations with academia, industry, and government organisations, translating AI research into practical applications. ➤ Led externally funded research projects, supervising researchers and students while delivering high-impact publications, datasets, software, and AI systems. ➤ Designed multilingual NLP and LLM evaluation frameworks, benchmarks, and scalable AI pipelines supporting research and industrial deployment. ➤ Served in senior academic leadership roles including Co-Director of the UCREL NLP Research Group and Director of Admissions.
2012 2019	Senior Research Associate, LANCASTER UNIVERSITY, United Kingdom ➤ Conducted research across multilingual NLP, machine learning, and large-scale language technologies, developing methods for summarisation, information extraction, sentiment analysis, readability, and semantic processing. ➤ Developed multilingual corpora, benchmarks, evaluation frameworks, and deployable NLP tools supporting both research and real-world applications.
2011 2011	NLP Researcher, NATIONAL INSTITUTE OF INFORMATICS (NII), Tokyo, Japan ➤ Conducted research on multilingual NLP, automatic summarisation, and cross-language information retrieval using large multilingual corpora. ➤ Developed and evaluated multilingual NLP systems and benchmarking methodologies for international research initiatives.
2010 2012	Data Migration and Systems Developer, UK DATA ARCHIVE, UNIVERSITY OF ESSEX, United Kingdom ➤ Designed and implemented large-scale data processing systems supporting reliable storage, migration, and retrieval of research data. ➤ Developed robust software solutions emphasising scalability, reliability, data integrity, and efficient data management.

Academic Qualifications

- 2012 PhD in Computer Science, University of Essex, UK
- 2008 MSc in Information Systems, University of Jordan
- 2005 BSc in Computer Information Systems, University of Jordan

Teaching and Professional Qualifications

- 2026 Professional Member of the British Computer Society (MBCS)
- 2026 Professional Member of the Association for Computing Machinery (ACM)
- 2026 Member of the Association for Computational Linguistics (ACL)
- 2026 Member of the European Language Resources Association (ELRA)
- 2025 Member of the Institute of Electrical and Electronics Engineers (IEEE)
- 2021 Fellow of the Higher Education Academy (FHEA), Advance HE, UK
- 2010 Graduate Teaching Assistant, University of Essex

Training

- 2026 Designing and Using Rubrics – March 2026
- 2026 DesignPlus Training Course – February 2026
- 2026 Information Security Awareness – January 2026
- 2026 Excellence in Educational Technologies – February 2026
- 2026 Student Analytics and Retention – November 2025
- 2026 Excellence in Exam Invigilation – November 2025
- 2025 Effective Doctoral Supervision – March 2025
- 2025 Equality, Diversity & Inclusion – March to October 2025
- 2025 Online Mental Health Training – March 2025
- 2025 Health and Safety for Staff – March 2025
- 2024 Emergency First Aid at Work – British Red Cross (Valid: March 2024 to March 2027)
- 2024 First Aid for a Severe Allergic Reaction – British Red Cross (Valid: March 2024 to March 2027)

MAJOR & RECENT PROJECTS

POLICYVERSE: MULTILINGUAL MULTI-AGENT LLMs FOR POLICY REASONING 2026

Funding: USD \$100,000 – Accelerating Research Excellence Program (PI)
multi-agent LLM framework for CMR: an automated system that detects overlaps, highlights potential inconsistencies, and maps dependencies across policy documents.

INSTRUCTION-LANGUAGE DRIFT IN ADAPTED MULTILINGUAL INSTRUCTION-TUNED LLMs 2026

Funding: USD \$20,000 – CECS Seed Funds (PI)
investigates instruction-language drift in multilingual instruction-tuned large language models (LLMs) after post-adaptation.

DYNAMIC MODELS FOR REAL-TIME AUTONOMOUS DECISION MAKING IN THE REAL WORLD 2026

Funding: USD \$100,000 – Accelerating Research Excellence Program (Co-I)
develop approaches for decisions under uncertainty, taking into account epistemic uncertainties caused by the simulation model itself, and the stochasticity of the environment.

DETECTING GREENWASHING AND GREENHUSHING RISKS WITH ADVANCED NATURAL LANGUAGE PROCESSING: TOWARD SMARTER GREEN FINANCE 2025

Funding: USD \$18,000 – CBM Seed-funds, VinUniversity (CO-I)
data-driven framework for assessing firm-level greenwashing and greenhushing risks.

REETXT-VI: VIETNAMESE-ENGLISH FREE-TEXT SURVEY ANALYSIS 2025

Funding: USD \$7,200 – Cross College Funds VinUniversity (PI)
Automated bilingual survey analysis platform for open-ended responses.

VISAS: VIETNAMESE SEMANTIC TAGGING SYSTEM 2025

Funding: USD \$7,200 – Cross College Funds VinUniversity (PI)
ViSaS is an open-source project building a semantic tagging system for Vietnamese inspired by the USAS/AraSAS frameworks.

MONITORING WATER PIPE BURSTS WITH NLP 2025

Funding: USD \$13,400 – South West Water UK (Consultant)
Using natural language reports to predict and monitor water infrastructure failure.

A SMALL WELSH LANGUAGE MODEL PILOT FOR SENTIMENT ANALYSIS TESTING 2025

Funding: USD \$13,400 – Welsh Government (PI)
Pilot transformer-based language model for Welsh.

DIGIGRID: WELSH LANGUAGE RESOURCE HUB 2024

Funding: USD \$6,700 – Welsh Government (PI)
Infrastructure for collecting and managing Welsh language resources.

CATALYST FOR CELTIC LANGUAGES NLP RESEARCH 2024

Funding: USD \$13,300 – Lancaster University (PI)
Support for developing datasets and tools for low-resource Celtic languages.

EARLIER PROJECTS

CARE: CANADIAN ANNUAL REPORTS EXTRACTOR 2023

Funding: USD \$38,100 – Mitacs, HEC Montréal, CPA Canada (PI)
Corpus and pipeline for financial NLP in Canadian disclosures.

BEYOND THE PAYCHECK 2023

Funding: USD 700,000 – Carlsberg Foundation (Grant CF23-0987) (Consultant)
Working with the University of Southern Denmark's Dr Seetha Menon.

THESAURUS OF CONTEMPORARY WELSH 2022

Funding: USD \$134,000 – Welsh Government (PI)
Construction of a modern Welsh thesaurus using embeddings.

WELSH SUMMARY CREATOR (WSC) 2022

Funding: USD \$134,000 – Welsh Government (PI)
Automatic summarisation system for Welsh language texts.

CLARA-FIN: FINANCIAL READABILITY 2021

Funding: USD \$46,990 – Spanish Agency for Research (Consultant)
Readability metrics for financial disclosures in English and Spanish.

CORPORATE DISCLOSURE ASSESSMENT (AS15) 2021

Funding: USD \$27,940 – IAAER/KPMG (PI)
Evaluation of corporate narrative disclosures.

ARASAS: ARABIC USAS TAGGER 2021

Funding: USD \$7,620 – Zayed University UAE (PI)
Semantic tagger for Arabic texts aligned with USAS framework.

FINT-ESP: SPANISH FINANCIAL TEXTS 2018

Funding: USD \$44,450 – Spanish Agency for Research (Consultant)
Building and analysing financial corpora in Spanish.

BIO TEXT MINING (BIOtM) 2018

Funding: USD \$120,000 – Wellcome Trust UK (Researcher)
Biomedical text mining for mental health and biomedical literature.

INFLUENCES ON CORPORATE FINANCIAL INFORMATION ENVIRONMENT 2012

Funding: USD \$380,000 – UKRI (Researcher)
Investigating links between media, reporting and investor response.

UNDERSTANDING CORPORATE COMMUNICATION 2014

Funding: USD \$100,000 – UKRI (Researcher)
Analysis of narrative strategies in corporate communication.

SKOS-HASSET: ENGLISH SOCIAL SCIENCE THESAURUS 2012

Funding: USD \$120,000 – Jisc (Developer)
Development of a SKOS-based thesaurus for social science terminology.

GENERATIVE AI, MULTILINGUAL NLP & LANGUAGE TECHNOLOGIES

I develop Generative AI, multilingual NLP, multimodal AI, and large language model technologies across domains including health-care, finance, education, governance, legal text, and cultural heritage. My research spans multilingual language modelling, multimodal learning, retrieval-augmented generation, agentic AI, evaluation, and trustworthy AI. I have created 35+ multilingual datasets, benchmarks, and open-source language resources, led international workshops and shared tasks, and collaborated with academia, industry, government, and regulatory organisations on applied AI research.

Generative AI, LLMs & Multimodal AI

- › Develop large language model and Generative AI solutions for multilingual text generation, summarisation, information extraction, reasoning, question answering, and evaluation.
- › Conduct research on multimodal AI combining text, images, and structured information for document understanding, summarisation, and knowledge extraction.
- › Design multilingual LLM evaluation frameworks, retrieval-augmented generation (RAG) pipelines, and agent-based AI workflows.
- › Build scalable Python-based AI pipelines supporting experimentation, benchmarking, model evaluation, and language technology research.

Multilingual NLP & Language Resources

- › Worked on multilingual and low-resource NLP across more than 20 languages, including language modelling, corpus creation, benchmarking, and evaluation.
- › Created and released 35+ multilingual datasets, corpora, benchmarks, lexicons, and language resources supporting NLP and AI research.
- › Developed evaluation methodologies for multilingual NLP, Generative AI, and large language models using both automated and human-centred evaluation.

Data, Annotation & Evaluation

- › Designed multilingual data collection and annotation workflows using expert and crowd-based annotation platforms including Amazon Mechanical Turk, Appen, and Prolific.
- › Developed annotation guidelines, quality assurance protocols, and inter-annotator agreement frameworks for multilingual NLP and LLM evaluation.
- › Built scalable data processing and evaluation pipelines supporting reproducible AI research.

Research Leadership & Collaboration

- › Led international workshops and shared tasks in Financial NLP, Arabic NLP, multilingual NLP, and Generative AI.
- › Collaborated with industry, government organisations, regulators, and international universities on multilingual AI and language technology research.
- › Developed AI methodologies and language technologies with organisations including the Financial Conduct Authority, CPA Canada, Yseop, Signal AI, National Trust, Museum Wales, and the Welsh Government.

LEADERSHIP, RESEARCH MANAGEMENT & ACADEMIC SERVICE

I have held leadership roles across research, academic management, and institutional administration in both the UK and Vietnam. These include Director of NLP @ VinUniversity, Co-Director of the UCREL NLP Research Group, and Director of Admissions at Lancaster University. I have led externally funded research projects, supervised multidisciplinary research teams, and worked closely with industry, government, and regulatory organisations on collaborative AI and NLP research.

Research Leadership

- › Principal Investigator and Co-Investigator on externally funded research projects in multilingual NLP, Generative AI, and large language models.
- › Lead multidisciplinary research projects involving academic, government, industry, and public-sector partners.
- › Define research directions, coordinate project delivery, and oversee research outputs including publications, datasets, software, and technical reports.

People Management & Mentorship

- › Managed and supervised researchers, research assistants, PhD students, professional services staff, and student ambassadors.
- › Mentor early-career researchers on research methodology, publication, grant development, and career progression.
- › Lead distributed teams across multiple institutions and international collaborations.

Institutional Leadership

- › Director of NLP @ VinUniversity, leading the University's NLP research activities and external collaborations.
- › Co-Director of the UCREL NLP Research Group, supporting research strategy and international collaboration.
- › Director of Admissions at Lancaster University, leading admissions operations, recruitment activities, and cross-university engagement with marketing, international recruitment, external engagement, careers, and academic departments.

Professional & International Service

- Collaborate with industry, government organisations, and regulators on applied AI and NLP research projects.
- Organise international workshops and shared tasks, and serve as Area Chair and programme committee member for leading AI and NLP conferences.
- Develop long-term research collaborations with universities and organisations across Europe, the Middle East and Asia.

WORKSHOPS, CONFERENCES, AND PROFESSIONAL SERVICE

Below is a selection of workshops, conferences, and academic service roles I have organised or contributed to:

- Financial Narrative Processing (FNP) Workshop Series [General Chair]
- Workshop on NLP for Languages Using Arabic Script (AbjadNLP) Series [General Chair]
- Workshop on Arabic Corpus Linguistics (WACL) Series [General Chair]
- Celtic Languages in the Digital Age (CLIDA) [General Chair]
- NLP Bridges Initiative [General Chair]
- LLMs, Big Data, and Multilinguality for All (LLMs4All) [General Chair]
- First International Conference on NLP and AI for Cyber Security (NLPAICS 2024) [Programme Chair]
- 7th Healthcare Text Analytics Conference (HealTAC 2024) [Programme Chair]
- IndoNLP: Workshop on NLP for Indo-Aryan and Dravidian Languages [Programme Chair]
- Nakba-NLP Workshop Series [Programme Chair]
- The 7th Workshop on Open-Source Arabic Corpora and Processing Tools (OSACT7) [Programme Chair]
- Third Arabic Natural Language Processing Workshop [Publication Chair]
- Readability for Low Resourced Languages (RLRL) [General Chair]
- Area Chair for Information Extraction, and for Low Resource and Endangered Languages (ACL, LREC, COLING, EMNLP, Arabic-NLP)
- Advisory Board Member, SIGARAB – ACL Special Interest Group on Arabic NLP
- Editorial Board, Natural Language Engineering (NLE) Journal
- Advisory Board, Natural Language Processing Book Series

RESEARCH IMPACT & INDUSTRY COLLABORATION

My research spans Artificial Intelligence, Natural Language Processing, multilingual large language models, Generative AI, trustworthy AI, and multimodal AI across domains including finance, healthcare, governance, education, and public policy. Over the past fifteen years I have led and contributed to international research projects involving multilingual NLP, language technologies, and AI systems in collaboration with universities, industry, government organisations, and regulators.

My work has been supported through competitive funding from organisations including KPMG/IAAER, CPA Canada, the Spanish Agency for Research, the Welsh Government, the Carlsberg Foundation, and other national and international funding bodies. I have collaborated with organisations including the Financial Conduct Authority, CPA Canada, Yseop, Outscale, National Trust, Museum Wales, the Welsh Government, and partners across Europe, North America, the Middle East, and Asia.

I have established and led several international research initiatives, including the Financial Narrative Processing (FNP) workshop series, shared tasks in Financial NLP and Arabic NLP, and workshops on multilingual AI and language technologies. My research outputs include datasets, benchmarks, open-source software, and language resources released through GitHub, HuggingFace, and institutional repositories, supporting reproducible research in multilingual NLP, Generative AI, and trustworthy AI.

Financial Narrative Processing Workshop: [\[FNP Workshop Series\]](#)

Publications and citations: [\[Google Scholar\]](#)

MEDIA COVERAGE & PUBLIC ENGAGEMENT

My research has received coverage from international media, universities, government organisations, and industry partners, reflecting the impact of my work in multilingual AI, Natural Language Processing, and language technologies.

- **Al Jazeera Arabic (2026)** – Contributed to a feature on multilingual AI, discussing the importance of ensuring that all languages are represented in the future of artificial intelligence. [\[Article\]](#)
- **CFIE-FRSE** – A Financial NLP platform for analysing corporate reports, featured by Business24, Wealth Professional Canada, Science Codex, Lancashire Business View, ICTK.ch, and Presstext.
- **FreeTxt Platform** – A multilingual NLP platform for analysing open-ended survey responses, featured by Cardiff University, Lancaster University, and the Welsh Government.
- **Additional Coverage** – Research featured by organisations including Yseop and Lancaster University, highlighting work in NLP, multilingual AI, and international research initiatives.

RESEARCH FUNDING AND INFRASTRUCTURE LEADERSHIP

I have played a leading role in securing funding, equipment, and research capacity for NLP groups at both Lancaster (UCREL) and VinUniversity (NLP @ VinUni). These investments have strengthened infrastructure, attracted PhD students, and positioned both groups for long-term impact.

VINNLP, VINUNIVERSITY

HIGH-PERFORMANCE COMPUTING CLUSTER 2025

Funding: Institutionally approved, multi-phase investment – VinGroup

Contributed as a member of a cross-college academic and technical team (approximately ten contributors) to secure institutional approval for a university-wide HPC infrastructure supporting AI and NLP research within CECS. The investment is centrally managed and released in staged phases between 2025 and 2027, aligned with procurement and deployment milestones. Initial hardware deployment is expected in mid-2026, with completion of the dedicated data centre planned for 2027.

UCREL, LANCASTER UNIVERSITY

NLP LABORATORY EXPANSION 2023

Funding/Support: 12 GPU-enabled machines (£2,000 each; £24,000 total, from £4M Office for Students (OfS) grant to SCC)

Directed part of an OfS-funded investment towards strengthening UCREL's NLP infrastructure. The machines were integrated into the HEX platform, providing advanced facilities for large-scale NLP research.

MICROSOFT EQUIPMENT DONATION 2024

Funding/Support: HP Z8 Tower (\$6,500, donation)

Secured a high-spec workstation from Microsoft, expanding UCREL's computational capacity through the HEX platform.

RESEARCH CAPACITY BUILDING 2023–2024

Outcome: Four academic appointments

Supported UCREL's development by helping recruit four academics covering LLMs, Legal NLP, Language Resources, and Reference Chains.

ARABIC AND FINANCIAL NLP THEME 2016–2025

Outcome: 20+ PhD students attracted (self-funded) + 2 funded students

Established and led a long-running theme in Arabic and Financial NLP, attracting more than 20 self-funded PhD students and securing internal SCC funding for two fully funded projects.

DEVELOPING AND VALIDATING THE SPANISH VERSION OF THE LARGE LANGUAGE MODELS DEPENDENCY SCALE (LLM-D12-SP) 2026

Tran B., El-Haj, M., Al-Shakhsi S., Garcia-Cabot A., Ali R., and Yankouskaya A.
Discover Psychology Journal, July 2026.
